

**Truck Caps & Lids | Commercial Caps | Cargo Management**

Wherever you go, whatever you do, Jason has you covered.

### **Our History**

Jason Caps began because of one family's vision to build sturdy and durable pickup bed caps for an emerging US market. Jason was one of the first "truck shell" manufacturers to switch to fiberglass construction methods in the mid-1970s.

### **Jason Today**

Our 45,000 sq. ft. Elkhart, Indiana facility manufactures fiberglass truck caps and lids with all the skill, expertise and craftsmanship this region of the country is famous for. Our state-of-the-art Ottawa, Kansas facility adds another 90,000 sq. ft. of open- and closed-mold fiberglass manufacturing capacity, automotive-grade paint lines and curing ovens, innovative safety systems and equipment that make our plant a safer place to work while building the best products possible.

### **Build Your Own**

Easily spec-out your own Jason cap or lid online and receive a quote directly from your nearest dealer. Visit [www.JasonCaps.com](http://www.JasonCaps.com) and select "Build Your Own".
